

New Berry & Small Fruit Crop Plants

A Cluster of Tissue Culture

Saskatoon Berries, Honey Berries, Dwarf Sour Cherries

AgriForest is pleased to offer tissue culture-derived cold hardy small fruit tree plants of:

SASKATOON BERRIES

HASKAPS / HONEY BERRIES

DWARF SOUR CHERRIES

These varieties are selected and bred by the University of Saskatchewan, Agriculture Canada Research Centers and private breeders.

Our tissue culture plants are:

- True to the variety
- Exhibit a denser branching habit and floral production resulting in a larger fruit crop
- Characterised by even ripening for easier mechanical harvesting and pick-your-own operations

The fruits of these newly-released varieties are not only delicious but also a rich source of antioxidants and vitamins known for their roles in prevention of cancer and heart diseases!
