## 2019 PRICE LIST

Welcome to our 2019 Price List. We would like to take this opportunity to pledge our commitment to being your supplier of high quality tissue culture plants. We would also like to invite you to review our 2019 Price List and place an order with us this year. Our 2019 Product Catalogue, complete with images and variety descriptions, is available for you to download from our website, [www.agriforestbiotech.com](http://www.agriforestbiotech.com). If you are new to AgriForest, you are welcome to call us for a free sample. We are confident that you will be pleased with the quality of our tissue culture plants.

### Product Information and Minimum Orders

Even though we have listed all the varieties we have in culture in our laboratory, some varieties require advance notice to produce in the size or quantity that you may need. Although we have most varieties available all year round, to ensure that you receive your complete order on time, please place your order at least 6 months prior to your preferred shipment date. Depending on your need, ease and economy of shipments, we can supply our plants in following different sizes:

- **Tissue Culture Plantlets:** For our overseas customers we can supply tissue culture derived plantlets straight from our laboratory in sterile conditions to meet the plant quarantine requirements of your country. However, there is a minimum order for the In Vitro Tissue Culture Plantlets destined for overseas customer. Please contact us to discuss your requirement. For those customers who are not familiar with the handling of these plantlets, we will provide specific instructions to handle these plantlets. Tissue Culture Plantlets are produced on a custom order basis only and we recommend that you discuss your needs well in advance to serve you better.
- **Liners:** This is the size of our products which provides the best value for your money! This size is usually available all year-round and in most cases we can ship them within days notice! More-over it is easy to handle at your end without the need of greenhouse facility and can be transplanted straight in the field or into larger containers! We produce tissue culture liners in 2.5"x2.5"x3.25" size pots, 32 pots per tray or tall 50 plug trays. Our liners are at minimum 6" tall but **can be up to 18" tall** when shipped depending on the shrub or tree variety or when the order was placed. To secure the largest possible liners we recommend that you place your order as early as possible as we ship the largest ones to those customers who has placed the order well in advance. The minimum order size for our tissue culture plants from the greenhouses is two trays per variety, with the entire order totalling at least \$500.
- **4" Pots:** We also produce some of our tissue culture plants in 4" pots. These come with individual colour picture labels and are intended for immediate retail sale as promotional items or for potting up into one gallon size containers for quick turnaround. The minimum order size for our tissue culture plants in 4" pots is 18 plants per variety, with the entire order totalling at least \$500. For 4" pots, we require a minimum of 6 months notice prior to your preferred shipment date.
- **Square One Pots:** For our garden center customers and landscape contractors we also now provide some of our tissue culture plants in Square One pots which measure approximately 5.5"x5.5"x6" tall. Since these are not our routine products, we recommend that you place your order at least 6 months in advance to receive your order on time when you need it. These pots come as retail ready products with large size picture labels with growing instructions. The minimum order per variety for this size container is one tray of 8 containers, with total order of at least \$500.

### Custom Propagation

AgriForest also engages in custom propagation projects for your specific needs. If you have a variety that you find difficult to propagate through conventional means or you have a new variety which you would like to bulk up quickly, feel free to contact us to discuss your specific requirements. Due to the costs of research and development we have a minimum order for custom propagation. Please contact us to discuss further and we will be to work out a mutually beneficial arrangement to meet your needs.

### Terms

All sales within Canada are in Canadian dollars. All US and overseas sales will be in US dollars. Payment in full prior to shipment is required for all new customers for the first order that is placed with AgriForest or until credit is established. A credit application will be sent along with the order acknowledgement. This must be filled out, signed,

and returned to AgriForest. **To those with approved credit and to our established customers, we extend a 30 day credit.** Overdue accounts will be charged interest at the rate of 2% per month (24% per annum) or the maximum allowable legal rate. The purchaser assumes ownership and responsibility of goods at the time of shipment. However, AgriForest retains a vendor's interest in all goods until they have been paid for in full.

#### **Guarantee and Claims**

AgriForest takes great care to ensure that all nursery stock is in good condition upon leaving our nursery. Claims for any cause must be made in writing within 10 days of receipt of goods. AgriForest will not consider any claim after stock has been processed, improperly stored, planted, or otherwise treated, modified or used in any way. Claims for losses while goods are in transit must be filed directly with the carrier. A credit note, which can be used for your next purchase with AgriForest, will be issued for legitimate claims. We do not cover the shipping costs related to replacement plants.

#### **Shipping Information**

AgriForest ships its products via two methods:

- **Small Orders:** In this case, plants are packaged in our custom designed shipping boxes and sent via courier (Greyhound, FedEx or UPS).
- **Large Orders:** In this case, our plants are placed on a custom-built pallet with wooden shelves, or in boxes which are shrink-wrapped. We use common carriers, with protective services where available. These pallets can be reused in your nursery or garden centre.

**All nursery stock is shipped at the purchaser's risk and expense, F.O.B. Kelowna, BC. We charge for packaging material at our cost.**

Orders may also be picked up at our premises in Kelowna, BC. Please call us in advance if you are planning to pick up your order and it will be assembled and ready to load. Our hours of operation are 8am to 4pm, Monday to Friday.

**Thank you for choosing AgriForest Bio-Technologies! We value your business and welcome any comments or suggestions that you may have so that we can serve your individual needs better.**

## **About AgriForest Bio-Technologies Ltd.**

AgriForest Bio-Technologies Ltd. is a plant biotechnology company, located in Kelowna, BC, that produces economically important and unique plant varieties through tissue culture technology for the horticulture, agriculture, and forestry industries.

AgriForest was originally established in 1984 with a mission to provide tissue culture dwarf fruit tree rootstocks to local orchardists. Since then, we have expanded to produce high quality tissue culture liners of Shade trees, Ornamental shrubs, Roses, Clematis, Lilacs, Saskatoon and Honey berries, Hostas, Heucheras and other Perennials as well as Small Fruit Trees Plants suitable for colder climates. The list does not stop there! Our Research and Development department is constantly working on adding new plant varieties and developing environmentally friendly tissue culture and greenhouse production technology. Producing over a million plants, AgriForest is now one of the largest suppliers of tissue culture plants in North America.

AgriForest also undertakes custom propagation projects for growers who want to commercialise a new variety, or have plants they find difficult to propagate conventionally, as tissue culture is often quite successful in propagating these varieties.

**AgriForest is a Clean Plant Certified Nursery and is also certified by Canadian Food Inspection Agency under Canadian Fruit Tree Export Program as per approved Pest Management Plan.**

## HASKAPS & HONEY BERRIES

AgriForest is pleased to offer an array of tissue culture derived Haskaps and Honey Berry plants released by the University of Saskatchewan as well as well known American and European Breeders under licensing agreement for propagation and commercialization rights. The Japanese origin edible blue honeysuckles have been named HASKAPS and those of Russian origin have been referred to as HONEY BERRIES. The two groups differ having different growing habits and berry size etc. but they both do have in common is that both produce excellent tasting deep blue berries rich in antioxidants which come very early into production and can be grown in most part of Canada and the Northern regions of the US. Our tissue culture Haskaps and Honey Berry plants are true to the variety, exhibit a denser upright branching habit and floral production resulting in larger berry crop, and are characterised by even ripening for easier harvesting. We have several Haskaps and Honey Berry varieties which are ideal for large scale commercial orchards requiring mechanical harvesting. Please contact us for the best possible selection of varieties for establishing a successful commercial orchard and value-added processing. Before you purchase anywhere contact us for a quote. You will be glad you did!

**Please ask for a quote if you are planning to develop a Haskap or Honey Berry Orchard and the total order quantity exceeds 5,000 units. Also ask for a free copy of our best selling 336 pages book called “Your Essential Honeyberry and & Haskap Guide” where we provide simple ideas on establishing a healthy and productive orchard when placing an order over 1000 plants!**
